

**Strawberry Fields Interactive INC.** is looking for a full-time Senior Unity Developer

Project Title: Aeksia

Genre: VR platform for Tabletop RPG

### **WHAT IS AEKSIA?**

Aeksia is where the tabletop experience and social interaction seamlessly blend. A place where role-playing game (RPG) enthusiasts can call home and meet to create, play and watch tabletop RPG campaigns in Virtual Reality. This is RPG storytelling taken to the next level.

### **YOUR ROLE**

We're looking for a talented Unity expert with a desire to own their work, as well as an eagerness to learn and grow. You're a developer with a proven track record shipping high-quality software. The ideal candidate will also be able to see the "big picture" in a variety of settings.

The ideal candidate is a self-motivated, multi-tasker, and demonstrated team player. You will be a lead developer responsible for the development of new software products and enhancements to existing products. You should excel in working with large-scale applications and frameworks.

### **Responsibilities and experience:**

- Collaborate with a small team to architect, develop and deploy a high-quality application;
- Writing clean, high-quality, high-performance, maintainable code;
- Develop and support software including applications, database integration, interfaces, and new functionality enhancements;
- Coordinate cross-functionally to insure project meets business objectives and compliance standards;
- Support test and deployment of new products and features;
- Participate in code reviews;
- Work with the creative team to realize a concept into implementation;
- Establish best practices for the team and collaborate with other project teams to standardize best practices.

### **Technical Skills:**

- Proven ability to deliver products from concept to delivery with Unity and C#;
- 4+ years of experience in software development in the games and/or VR/AR industry;
- Strong understanding of high-level architectural design and patterns;
- Create clean, clear and structured, style-correct code with all of the necessary documentation;
- Strong understanding of all aspects of the software development lifecycle;
- Experience with AR/VR and desktop applications or games;
- Ability to find creative solutions to difficult problems.

### **Team leadership skills:**

- Able to actively mentors intermediate and junior developers;
- A strong advocate for collaboration and interdisciplinary problem-solving;
- Able to synthesize and communicate the outcomes of collaborative sessions with team and clients;

- Ability to communicate complex issues and solutions to a wide range of audiences;
- Can manage conflict with tact and confidence;
- Highly committed to excellence; constantly looks for ways to raise the bar in order to achieve excellence in all areas;
- Proactive problem solver.

**Other Skills:**

- Have experience working with Agile or Scrum software development methodologies;
- Experience with multiplayer platforms, data modelling, handling, and visualization within an application;
- Bonus points for tabletop RPG players.
